

Quilting with your Embroidery Module Supply List

- Your **sewing machine and embroidery module** in good working order. Let me know if you wish to borrow a classroom machine.
- **User manual** for your machine (Non-BERNINA machines).
- **Machines hoops** and the matching **plastic templates**.
- **Machine needles** suitable for the size thread you are using. Microtex needle size 80 & 90 (size 80 for lighter thread & size 90 for heavier threads OR titanium needles in the same sizes)
- **Straight stitch throat plate**, (optional, extremely helpful)
- Amelie Scott's book "**Edge to Edge Quilting**" (Not the Pro version!) Available at The Old Country Store and Hinkletown Sewing. Designs are included. Additional design packs can be purchased
- **Fabric marker** – your choice in a color that works with your quilt – make sure it is a wash out marker!
- **6" x 12" or 24" ruler**
- **Basic sewing supplies**
- **Tape measure with metric**
- **Threads** for embroidery "quilting". These could be lightweight threads such as Isacord, variegated Superior Rainbow, medium weight threads such as Mettler 50 weight cotton or heavier threads such as Superior King Tut. Top and bottom thread does not have to match!
- **Something to quilt!** This can be any size from wall hanging to large quilt. If you wish to do something small, and have no quilts prepared, a preprinted panel or quilt top will work. Layer 3 layers: backing, batting and top and pin baste layers together. Make sure you have extra batting and backing border extending about 2-4" beyond quilt top to make hooping easier. A small **extra quilt sandwich** to try out the thread and design.

The design pictured is an overall design I created. If you would prefer this design to Amelie Scott designs, let me know. Cost: \$5

IMPORTANT NOTE: Please contact me by email or text telling me the machine, hoop, and design you are using . Thanks!
